Brad Theurer
Environmental Engineer
Autoliv ASP, Inc
3350 Airport Road
Ogden Utah, 84405

Dear Mr. Theurer:

Subject: Autolivs' Implementation of Project XL as Sponsored by EPA.

The Howell City Town Council has reviewed Autolivs' proposal to burn their waste propellants in the metals recovery facility at the Promontory location. After discussing the project with Autoliv personnel, the council feels that the processing of the waste materials through the air pollution control equipment associated with the metals recovery facility will be a more sound method of destruction than the present method of open burning. We encourage EPA to cooperate with Autoliv and to allow implementation of the project to help make our city and community a cleaner and better place to live.

The City of Howell commends Autoliv for its efforts to improve the environment and to safely handle their waste materials. The City of Howell is interested in the progress of this project and would appreciate information as to its future success.

Sincerely,

Mayor
